

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions/listings of claims in the application:

Listing of Claims:

Claims 1-49 (canceled)

50. (new) A delivery system comprising a foam exterior and a solid or non-aqueous liquid composition enclosed by the foam exterior, wherein the foam exterior comprises a polymeric material, and is adapted for stability upon contact with air and instability upon contact with water; and the composition comprises an active ingredient selected from the group consisting of dyes, enzymes, surfactants, brighteners, bleaches, bleach activators, fabric softeners, fabric conditioners, effervescing systems and mixtures thereof.
51. (new) The system according to claim 50 wherein the foam exterior is at least partially disintegrated, dispersed, denatured and combinations thereof, upon contact with water.
52. (new) The system according to claim 50, wherein the foam exterior is an elastic modulus of less than about 10 GN.m^{-2} .
53. (new) The system according to claim 50, wherein the foam exterior has a relative density of from about 0.05 to about 0.9.
54. (new) The system according to claim 50, wherein the polymeric material comprises a water-soluble polymer and/or a water-dispersible polymer.
55. (new) The system according to claim 50, wherein the polymeric material comprises a water-soluble polymer selected from the group consisting of: polyvinyl alcohol, polysaccharides, polycarboxylic acids, cellulose, modified cellulose, gums, derivatives of said polymers and mixtures thereof.
56. (new) The system according to claim 50, wherein the foam exterior further comprises a stabilizer, acidic material and/or plasticiser.
57. (new) The system according to claim 56, wherein the plasticiser is selected from the group consisting of: glycerol, ethylene glycol, diethyleneglycol, propylene glycol, sorbitol and mixtures thereof.

58. (new) The system according to claim 50, wherein the foam exterior is in the form of a pouch or three-dimensional coating.
59. (new) An absorbent article comprising the delivery system according to claim 50.
60. (new) A method of delivering a composition using the delivery system of claim 50, the method comprising the steps of enclosing the composition in the foam exterior and delivering the composition to an aqueous environment.
61. (new) A method of delivering a pre-dosed amount of a composition using the delivery system of claim 50, the method comprising the steps of enclosing the pre-dosed amount of the composition in the foam exterior and delivering the composition to an aqueous environment.
62. (new) The composition according to claim 61, wherein the pre-dosed amount of the composition in the form of a flowable composition, single granule or tablet.
